

Graph #2

In a city in which there are 90,000 employed workers, 18,000 are public employees. Of this number, the federal government employees 6,000; the state, 8,000; and the city 4,000.

- a) What percentage of all workers are public employees?
- b) What percentage of the public employees does the federal government employ?
- c) What percentage of all employees are employees of the state government?
