**Information students need to be aware of:**

- You will not be relying on any text but visuals. Be sure your are comfortable about that before presenting it to the class.
- Practice, practice, practice. Know what you have to say when those slides come up.
- You may use the questions (from “Ten Years From Now”) as a guide, but it might “get in the way.”
- Consider the pictures you put on each slide. You have 20 seconds to talk/slide. Have plenty of things to talk about. Does that mean you have plenty of pictures?
